Company and product boilerplate

Ready to paste. Tagline: AI Staff for Everyone.

ONE LINE

> Clairvoyance is the desktop environment where AI Staff do real work on your computer.

50 WORDS

> Clairvoyance is desktop software that puts named AI Staff on the user's own computer, where the files already are. Each Staff member has a role and memory, opens real projects, and hands back finished work. It ships on Windows, macOS, Linux, and the web. It is developed by Stardock Software.

150 WORDS

> Clairvoyance is the environment where AI Staff live and do real work on the user's computer. Staff members open local files, build and run projects, and return finished artifacts in the same workspace.
>
> Each Staff member has a name, a role, and memory that carries from session to session. They work in parallel, hand work to one another, and keep going on a schedule. They connect to Claude Code, Codex, Gemini, Copilot, Cursor, and Grok when those tools are already installed, and they can run local models on the user's hardware.
>
> Staff produce Notes, Canvases, Reports, Exhibits, and Binders: working documents and interactive pages saved where the user already works.
>
> Clairvoyance ships on Windows, macOS, Linux, and the web. The core app is free. Clairvoyance is developed by Stardock Software, a desktop software company with three decades of shipping products. Founder and CEO: Brad Wardell.
